September, 2017

It's fall time. The summer flew by. The trees are turning a beautiful color but it also means cooler weather in on its way. The 2017 Annual Fair Lower Brule has come and gone. Good times had by all. People got to visit old friends and relatives. People participated in lots of good activities and ate lots of good food. The day after the fair people were picking up trash at the Pow Wow, softball and rodeo grounds. Thank you so much. We really appreciate it!

We are on our last reporting quarter for this year. That's hard to believe, time seems to fly.

The Former Housing Authority Building has been demolished and the site looks really good.

The grass is coming up. I hope to see a new Boys & Girls Club there one day. We will be closing out this grant this year. We are very thankful for this Cleanup Grant we received from the EPA

We have finished the Limited Phase I/Transaction Screen's on the Old Boys & Girls Club and the Old Yellow School Buildings. We will be submitting TBA's (Targeted Brownfields Assessment Application's) for both sites to EPA for Phase II's. to be done.

September 29 and 30th two gentlemen Michael Cherny and Elliot Petri from Weston Solutions Inc.

Lakewood , CO. were here to do the Phase II's on the Old Boys & Girls Club and the Old Yellow School Buildings sites.

It's the time of the year for me to get out and look for new sites. If you know of any please let me know.

If you want to know anything about the Brownfields Program or need information about anything such as mold, asbestos, lead or the environmental. Please stop in and see me at the EPO Office. I would love to visit with you and show you what we do.

Thank you all for your support of our program.
